FIELD GUIDE · EVERY FEATURE, REAL SCREENSHOTS

Genesis Run

Blip's Next Block

A free arcade game in your browser. Blip, a little Bitcoin robot, escaped Head Office. You keep him free while you run through 10 eras of Bitcoin and Stacks history.

FREE · NO WALLET · NO SIGN-UP · SAVES ON YOUR PHONE

01

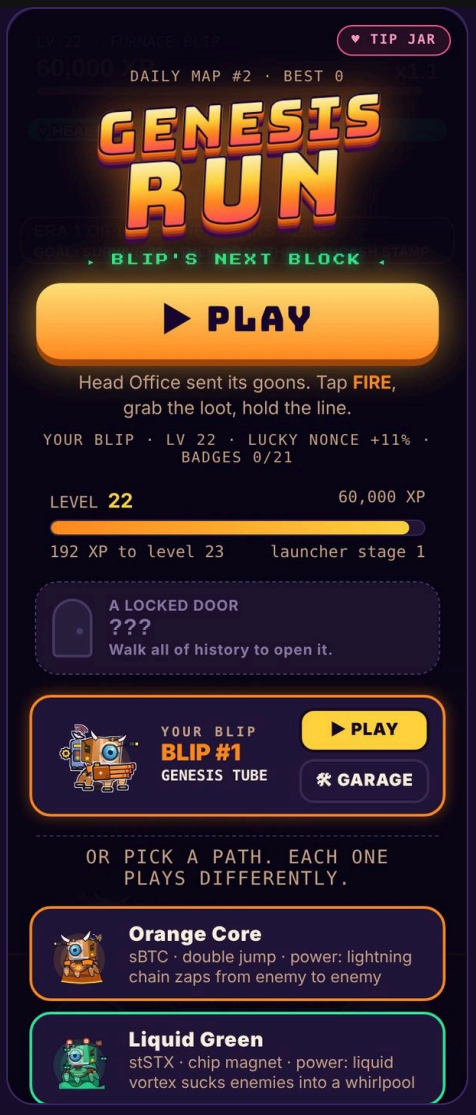

Start a run

The main menu shows your level, your XP and today's Daily Map. Tap the big **PLAY** button under the title to start with your Blip from the Garage. Your very first run shows 3 quick picture cards first, and tips pop up while you play your first few runs. Once you have reached era 2, a **PICK YOUR STARTING ERA** grid appears on the menu and at the top of the Garage: tap any era you have reached and your next run starts there. The Genesis Cup map always starts at era 1.

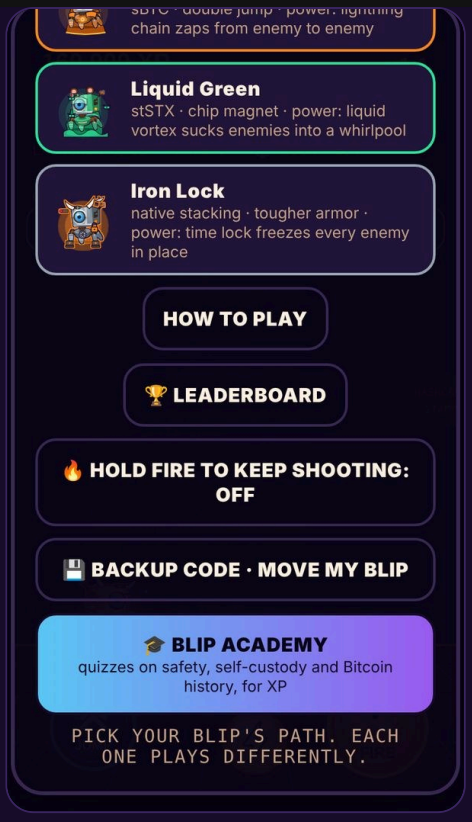

Further down you can also pick a **path**. Each one plays differently:

PATH	WHAT IT DOES
Orange Core	Double jump. Power: **Lightning Chain** zaps from enemy to enemy.
Liquid Green	Pulls chips in like a magnet. Power: **Liquid Vortex** sucks enemies into a whirlpool.
Iron Lock	Tougher armor (130 health). Power: **Time Lock** freezes every enemy in place.

Extra special moves. Clear era 3 (Genesis) to unlock **Block Drop** 🧱: a giant Bitcoin block crashes down in front of Blip, smashes what is under it, then stands for 4 seconds as a wall that blocks enemy zaps. Clear era 6 (Proof of Transfer) to unlock **Stacking Rain** 🌧️: 5 seconds of falling sats that hit enemies, and the ones that land fly to Blip as XP. Pick a special for each Blip in the Garage, under **SPECIAL MOVE**.

The main menu

Pick your path

TIP

Tap **HOW TO PLAY** on the menu any time to see the 3 picture cards again.

02

Story Mode

Tap 📖 **STORY MODE** on the menu to play Blip's whole story, from the Farm to your screen. It has **13 parts**: a prologue, 11 chapters and a finale. Each part opens when you clear the one before it, and each one teaches one rule of **Blip's Code**.

What you do in it

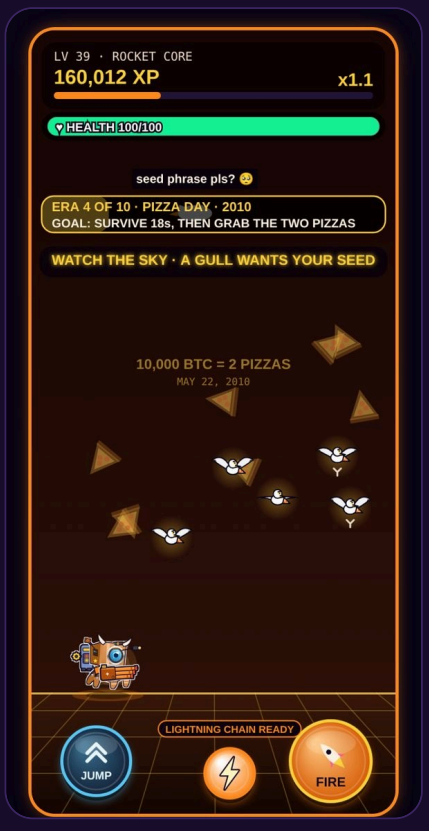

- **Comic scenes** tell the story between the action. Tap NEXT to go on.
- **Make a call** in the prologue, and **find the things left behind** in Chapter 1 (skip the decoys).
- **Sensei's question.** In a fight, ASK SENSEI asks one question. A right answer is a 2x critical hit. A wrong one loses the turn.
- **Short runs.** Chapters 3 to 11 each happen in their own era, with their own goal and one story moment you can play.
- **The finale** is a guard fight. Head Office tries 6 times to recall Blip, and one move blocks each try (it glows). On the last try, press and hold **HOLD THE EDGE** until the count ends.

The chapter map

Sensei asks

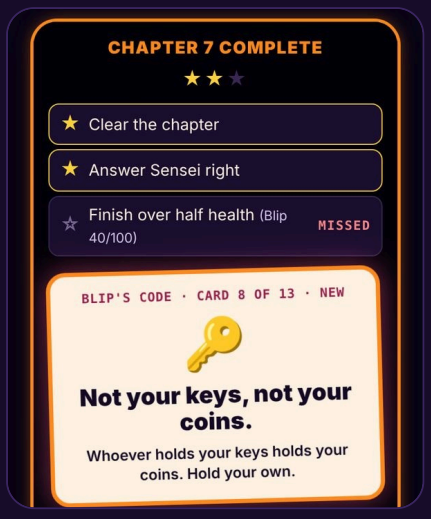

A story run

Stars and cards

- Each part gives up to **3 stars**: clear it, hit its goal (like answering Sensei right), and finish with over half your health. The win card shows which ones you got and which you missed.
- 3 stars also opens a **bonus hint**.
- Every part you clear adds a card to your 🃏 **CODE** collection. There are 13.

Bead has your back

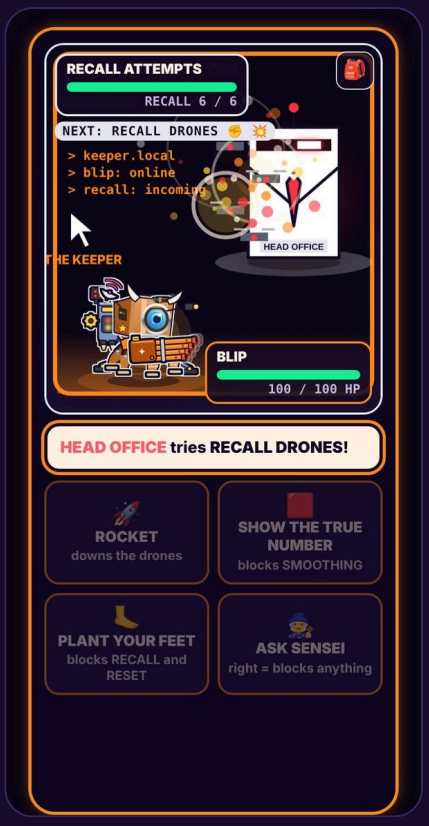

Bead the snail counts every try, and every try counts. Get caught twice on the same part (once in the finale) and you can pick **TRY WITH BEAD'S HELP**: a 3-hit shield in runs, or +30 health in fights. You also get a tip each time.

Stars and a Code card

Bead's help

The finale

After the story

- Finish all 13 parts to unlock a secret class, **Satoshi Prime**. You can try him in a trial run, then learn Zero-Day, Seed Phrase and Encrypt in the terminal to play as him.

- **Night Watch.** Once you clear Chapter 3, every part gets a harder orange 4th star. Get all 13 and Blip's antenna glows orange. It is just a look.

03

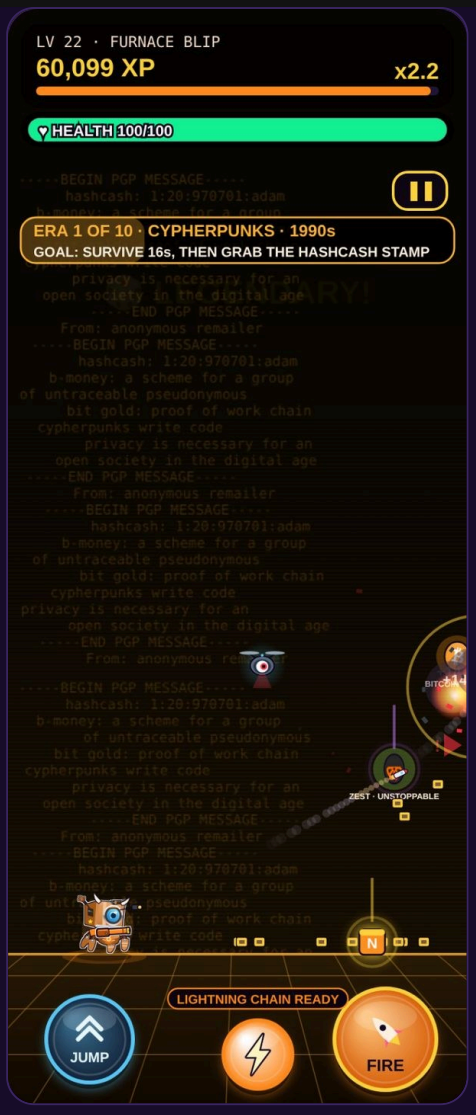

Controls

Three buttons sit at the bottom of the screen.

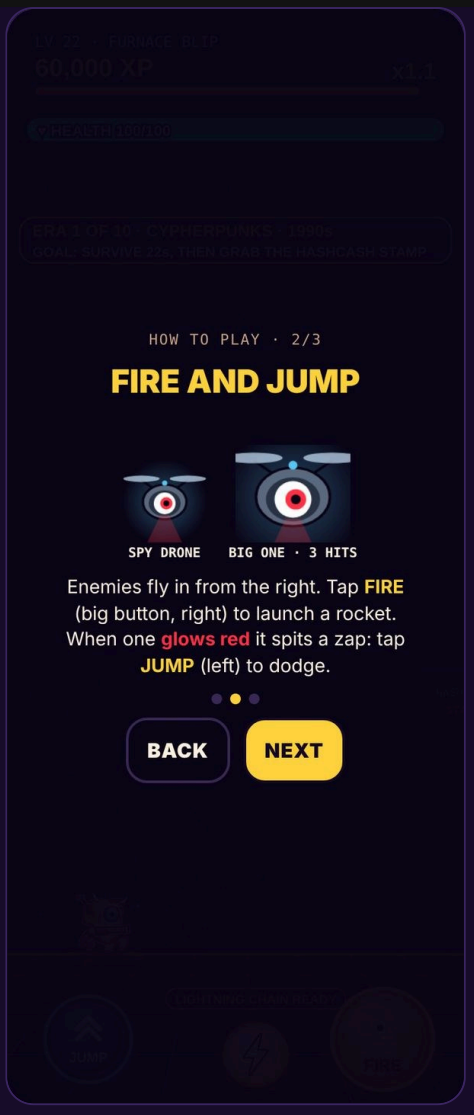

JUMP	⚡	FIRE
Left. Dodge zaps, grab chips in the air.	Middle. Your special power (your path's, or the one you picked in the Garage), when charged.	Right. One tap, one rocket.

Need a break? Tap the ❚❚ button under the health bar. You can resume, or end the run and go to the Garage or the main menu. You keep the run's XP either way, and the game pauses by itself if you leave the app. The pause screen also shows your launcher stage, wave, luck and combo, so the top of the screen stays clear while you play. Something broken? The pause screen has a ⚠ **REPORT A PROBLEM** button too.

Enemies fly in from the right. A **red !** on the right edge means more are coming. Your rockets find their own targets, so just keep tapping FIRE.

In a run

Enemies and their red zaps

TIP

Tired thumbs? Turn on **HOLD FIRE TO KEEP SHOOTING** in the menu. Then you can hold FIRE down instead of tapping. It starts OFF.

04

Health

- The bar at the top is your health. When it empties, the run ends.
- **The ground is safe.** Only enemies and their red zaps can hurt you.
- Every enemy you destroy heals you a little. Hearts heal **+35**.
- No single hit can take more than a quarter of your health, and you get a moment of safety after each hit.
- The **sBTC shield** blocks your next hit. It fades after 6 seconds, and a new one can't drop for 15 seconds after you grab one. Zest can drop at most every 30 seconds.

05

The 10 eras & bosses

Each run is a trip through history. In most eras you **survive 22 seconds**, beat that era's guardian, then grab its **relic**. Two eras are big boss fights.

1 **Cypherpunks** · 1990s
Guardian: Spam King, lord of the junk mail

2 **The Whitepaper** · 2008
Guardian: The Double-Spender

3 **Genesis** · 2009
Guardian: The Bailout Bank, too big to fail

4 **Pizza Day** · 2010
Guardian: Mama Gull, queen of the pizza box

5 **Mt. Gox** · 2014 · **BOSS**
The vault that ate the coins

6 **Proof of Transfer** · 2021
Survive and catch the falling sats

7 **FTX Collapse** · 2022 · **BOSS**
The tower of frozen funds

8 **Nakamoto** · 2024
Guardian: The Reorg Worm, eater of blocks

9 **sBTC** · 2024
Guardian: The Bridge Troll

10 **???**
Reach it to find out.

Halvings

Watch for halving banners in the Mt. Gox, Proof of Transfer and Nakamoto eras. When one hits, **half the enemies vanish**, just like the block reward

halves.

Boss battles: one turn at a time

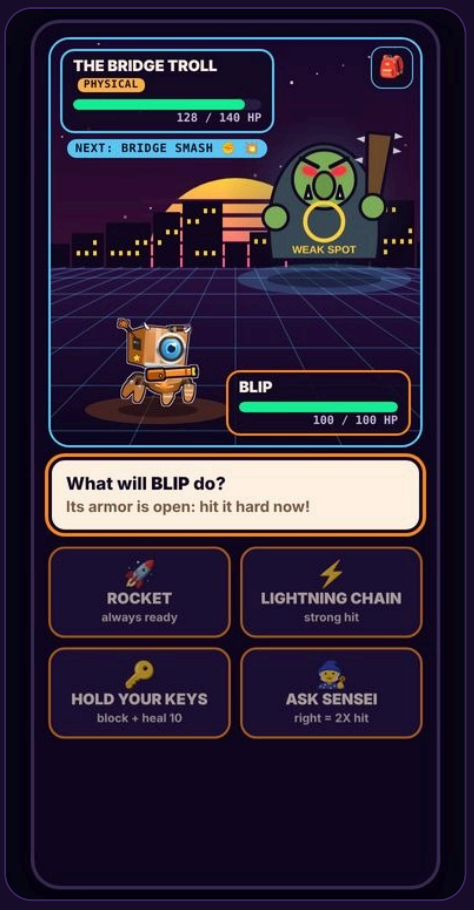

Every boss and every era guardian now pauses the run for a **BATTLE!**. You fight one turn at a time, and the boss always shows its **next move** above its health bar, so you can plan.

- 🚀 **Rocket** is always ready. A bigger launcher fires more rockets.
- **Your special** hits hard, then needs a few turns to recharge.
- 🔑 **Hold your keys** blocks the next hit and heals you. It also stops moves that freeze you or weaken you.
- 🧙 **Ask Sensei**: a right answer means a giant critical hit, and a wrong one loses the turn.
- 🎒 **The gear bag** shows what your launcher and shop upgrades do in battle. Every upgrade in the shop has a ⚔ battle line.

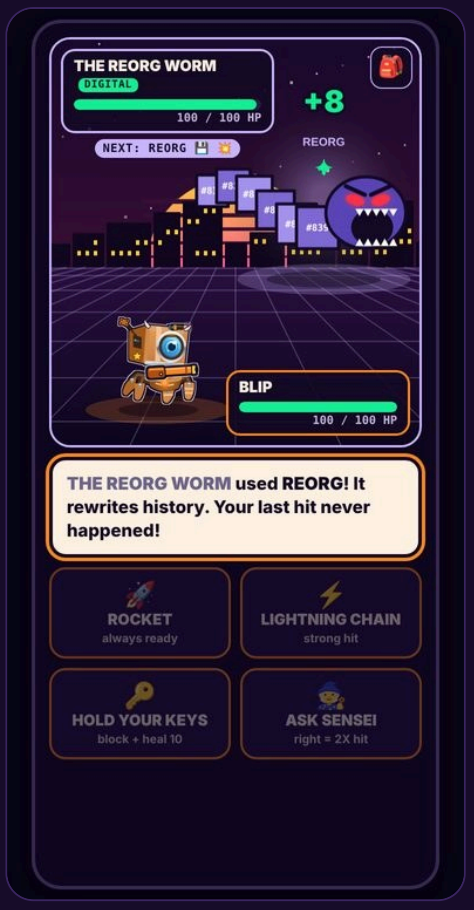

Each boss has its own trick:

- **Spam King** (digital): Phishing Link makes your next hit weaker.
- **The Double-Spender** (digital): a Fake Twin appears and soaks your next hit.
- **The Bailout Bank** (physical): bails itself out once with a big heal. Hit it hard early.
- **Mama Gull** (physical): Pizza Snatch steals health back. Digital hacks can't touch a bird.
- **Mt. Gox** (hybrid): Withdrawal Delay freezes you for a turn unless you hold your keys.
- **FTX** (hybrid): freezes your funds and prints tokens to heal. A Zero-Day stops the printing.
- **The Reorg Worm** (digital): Reorg undoes your last hit, as if it never happened.
- **The Bridge Troll** (physical): its armor halves your hits until it lifts its club. Then hit it for +50% before the Bridge Smash.
- **Head Office** (hybrid, the final boss): recall drones, smoothing, recall orders and a factory reset.

Win and the run goes on with the usual Boss Down rewards. Lose and the run ends, with a tip for next time.

The Bridge Troll lifts its club

The Reorg Worm rewrites history

Hacker skills & the Terminal

Everyone starts with 2 **Hash points**. Earn more: 1 every 5 levels, 2 for each boss battle you win, and 1 for every 3 right Sensei answers. Spend it in the green **Terminal**, which opens from the menu card, the shop or your gear bag. There are 12 skills in 3 branches: **Exploits** (attacks), **Cold Storage** (defense) and **Cypherpunk Tricks**. Each skill goes from LV 1 to 3. A tier 2 skill opens once you know a tier 1 skill in the same branch. **Reset** gives every point back for free. In battle, learned skills show up under 💻 **HACK**.

Physical vs digital. Every move and every boss is physical ✊ or digital 💾. Digital hacks can't touch a physical boss, so they show **IMMUNE**. Rockets only half-hurt a digital boss. A matching type hits 25% harder. Hybrid bosses like Mt. Gox, FTX and Head Office take full damage from both.

Special Blips: skill slots & classes

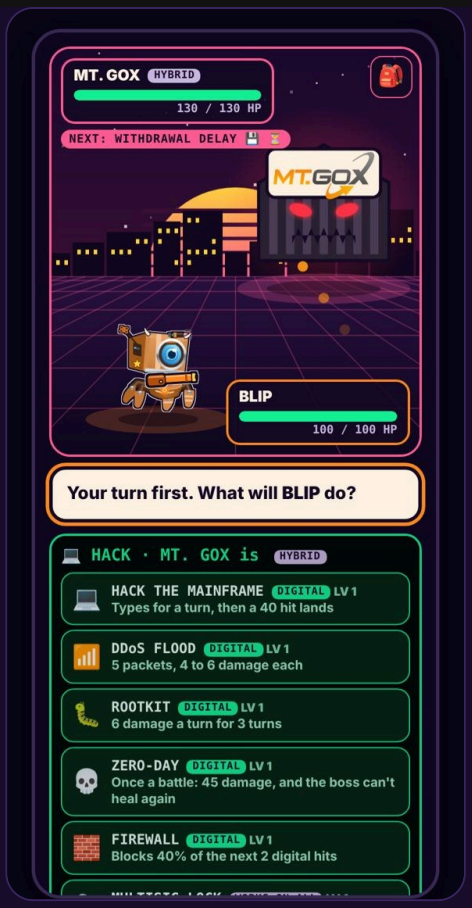

Only **3 skills go into battle** at once. Learn as many as you like, then tap **+ PUT IN A SLOT** in the Terminal to choose your 3. Reset stays free.

Put the right 3 together and Blip **transforms** into a special edition with its own look, its own rockets (in runs and battles) and a bonus:

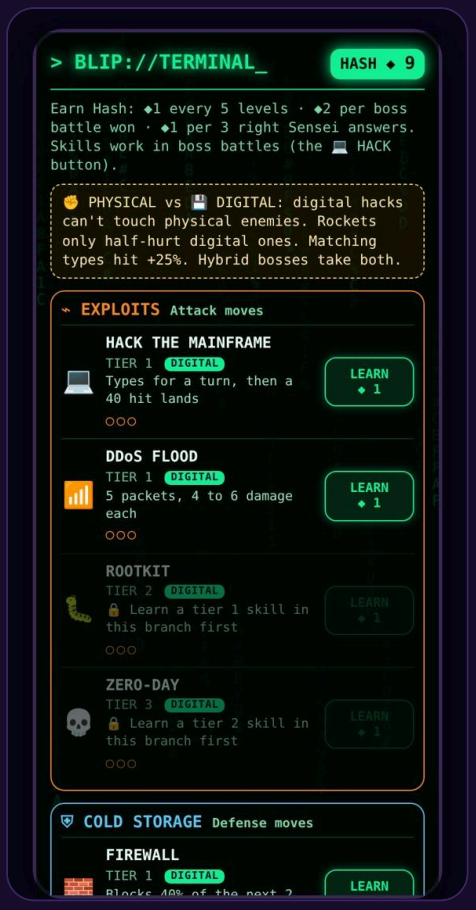

- **The Phreaker**: any 3 Exploits skills. Hacker green, data-packet rockets. Attack hacks recharge 1 turn faster.
- **Cold Vault**: any 3 Cold Storage skills. Ice armor, ice-shard rockets. Firewall and Multisig each block 1 extra hit.
- **Cypher Ghost**: any 3 Cypherpunk Tricks skills. See-through and glitching. A ghost copy takes the boss's first hit.
- **??? (secret)**: the three strongest skills together. We won't spoil this one.

Class unlocked

The HACK menu

The Terminal

06

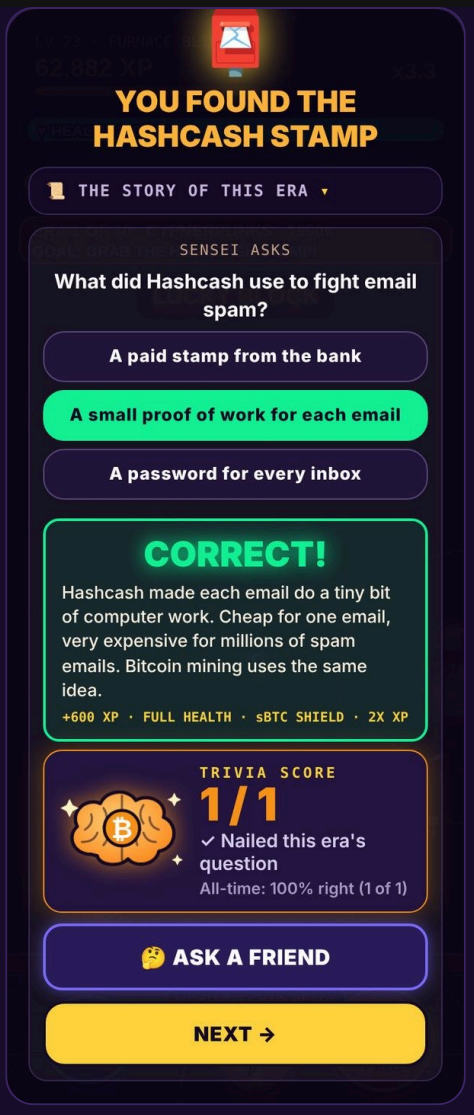

Between eras

When you clear an era, three short screens follow.

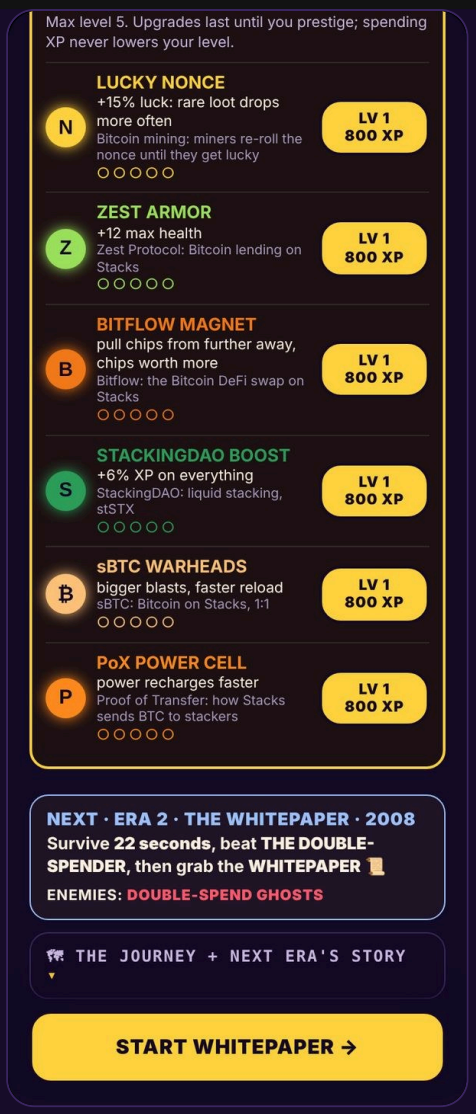

- **Era cleared.** Your grade (S, A, B, C or D, from your kills, streak, hits taken and aim), your stats and a **Blip's Tips** card: one safety tip, self-custody tip or bit of Bitcoin history, a new one every time (32 in all). Tap **SHARE THIS ERA** to post it, or **PROCEED** at the top.
- **One question.** Each era has 6 Sensei questions that climb from ★ easy to ★★ harder to ★★★ hardest. Answer right for +600, +900 or +1,200 XP, full health, a shield and 2x XP. A question you get right never comes back; a missed one does. A wrong answer still gives +100 XP and heals you halfway. Tap **ASK A FRIEND** to send the question to someone. Want the history? Tap **THE STORY OF THIS ERA** and Sensei Stackysius, Blip's robot monk teacher, tells it.
- **The shop and START.** Spend XP on one upgrade, see the next era's goal, then tap **START**. The journey map and the next era's story are under a tap-to-open box.

Era cleared + your grade

The era question

Shop, next era, START

The journey (tap to open)

07

Loot & Lucky Nonce

Every enemy you destroy rolls the dice for a drop. Run into drops to grab them.

DROP	RARITY	WHAT IT DOES
XP chips	Common	XP
Heart	Uncommon	+35 health
Bitcoin coin	Uncommon	2x XP for a while
Bitflow magnet	Rare	Pulls chips to you
sBTC shield	Rare	Blocks the next hit
Meme coin	Rare	Goes in your Meme Bag
Zest	Epic	Unstoppable for a while
Lucky Block	Legendary	A jackpot of loot

Lucky Nonce is your luck score. It makes rare drops come more often. You get luck from your level (half your level, as a %), from each prestige (+10%) and from the Lucky Nonce upgrade in the shop (+15% a level). The name comes from Bitcoin mining: miners keep re-rolling a number called the nonce until they get lucky.

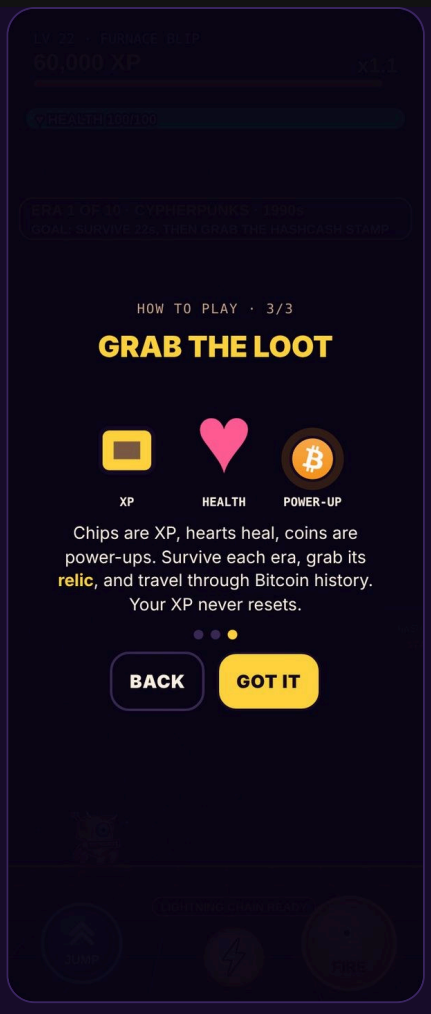

Meme coins ($FLAT, $LEO, $DOG) are silly community memes on Stacks, just fun to collect. Get all 3 for a badge. They are not investments.

A rare drop

Lucky Block jackpot

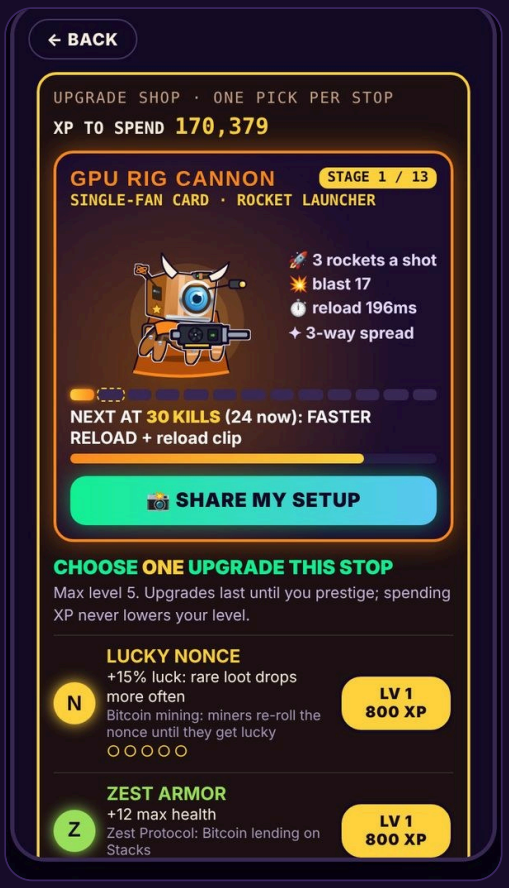

The coin power-ups

08

The upgrade shop

After each era you can buy **one upgrade** with your XP. Each one goes up to level 5. Prices are 800, 2,000, 4,500, 9,000 and 18,000 XP. Spending XP never lowers your level.

UPGRADE	EACH LEVEL GIVES
Lucky Nonce	+15% luck for rarer drops
Zest Armor	+12 max health
Bitflow Magnet	Pulls chips from further away, chips worth more
StackingDAO Boost	+6% XP on everything
sBTC Warheads	Bigger blasts, faster reload
PoX Power Cell	Your power recharges faster

The shop also shows your launcher

09

Launchers & the Garage

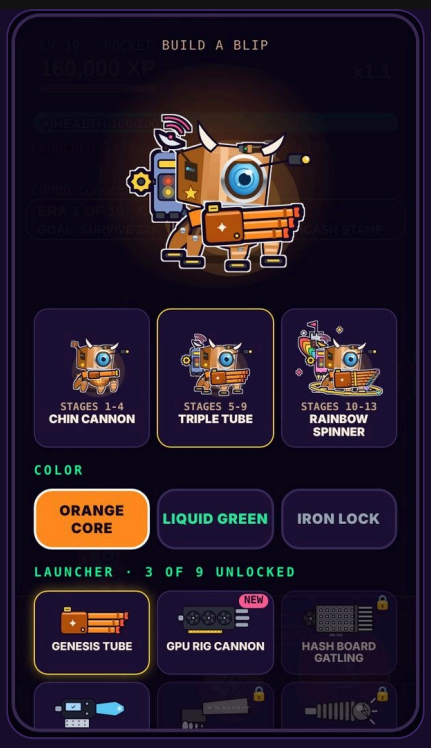

Your launcher climbs **13 stages** every run as you rack up kills, and changes look three times on the way. There are 9 launchers. You unlock them by playing:

LAUNCHER	STYLE	HOW TO UNLOCK
Genesis Tube	All-rounder	Yours from day one
GPU Rig Cannon	3-way spread	Clear the Genesis era
Cold Storage Cryo	Freezing shots	Beat the Mt. Gox boss
Halving Howitzer	Shells split in half	Clear 4 eras in one run
Hash Board Gatling	2x fire rate	Reach 1,000 total kills
Lightning Arc	Shots arc on	Hit a x6 combo
Pizza Day Drum	Bouncing pizzas	Clear Pizza Day with an A or S
Full Node Railgun	Piercing rails	Get 10 questions right
PoX Reactor	2x power charge	Clear the Proof of Transfer era

The **Blip Garage** holds up to 6 Blips. Each one keeps its own name, color (path) and launcher. Tap a launcher to read its story, and share any Blip or launcher as a picture.

The Garage

Build a Blip

Launcher info

10

Levels, evolving & prestige

- **Your XP never resets.** Every run adds to it. Early levels earn XP more slowly, and you get full XP from level 40 on.
- Blip **evolves** as you level up, with new looks and gear like a cape.
- At **level 100** you can **prestige**: Bronze, Silver, Gold, Diamond, then Legend. Each tier adds a new look and +10% luck. Shop upgrades start fresh when you prestige.
- There are **21 badges** to collect, like First Blood, Max Combo and Coin Trio.

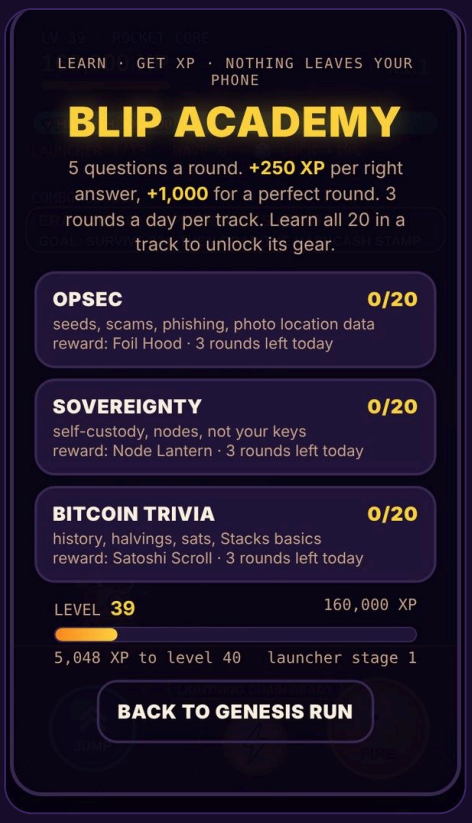

Blip evolves mid-run

11

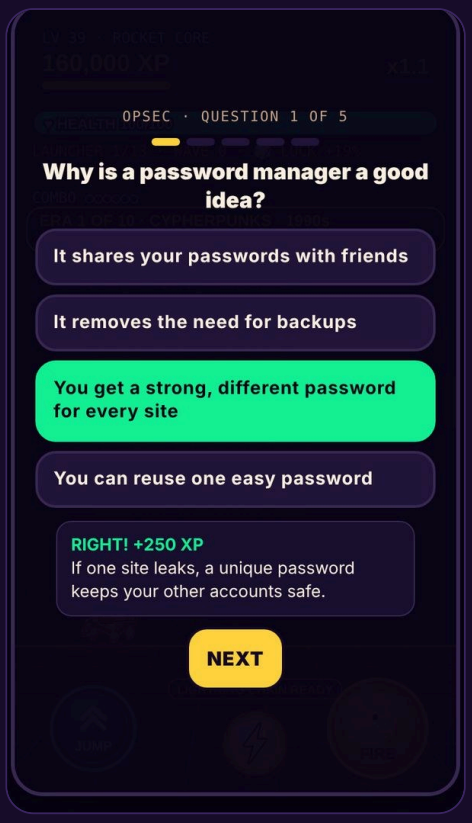

Blip Academy

Quizzes you can play from the menu, for XP. Nothing leaves your phone.

- Three tracks: **OpSec** (seeds, scams, phishing), **Sovereignty** (self-custody, nodes) and **Bitcoin Trivia**.
- 5 questions a round. **+250 XP** per right answer, **+1,000** for a perfect round.
- 3 rounds a day per track. Learn all 20 in a track to unlock its gear: the Foil Hood, the Node Lantern or the Satoshi Scroll.

Pick a track

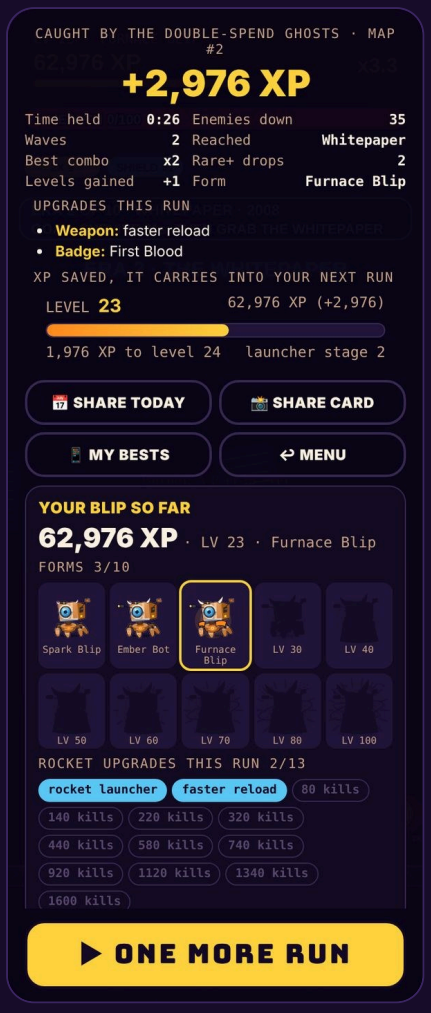

Learn something, get XP

12

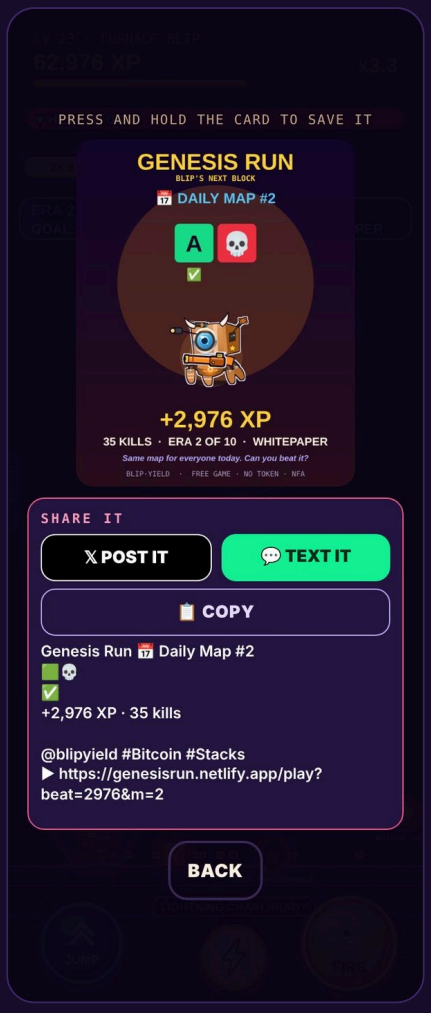

Daily Run & sharing

Everyone plays the **same map each day** (it changes at midnight UTC). The menu shows today's map number and your best score on it.

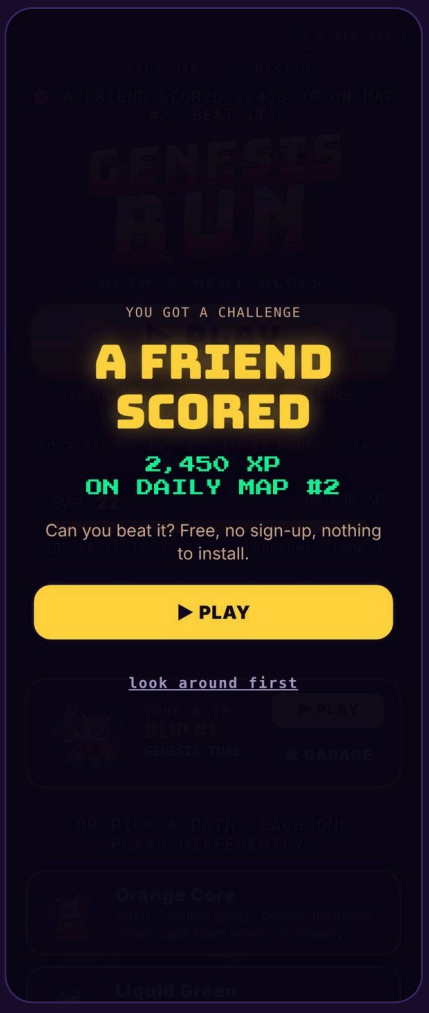

- **SHARE TODAY'S RESULT** makes a little emoji summary of your run, like Wordle.
- **SHARE CARD** makes a picture of your run.
- Every share includes the game link, **blip-yield.blipyield.workers.dev/play**. When a friend opens it, they first see **"A friend scored ___ XP"** with a PLAY button, and the game tells them if they beat it.

When a run ends

Share today's result

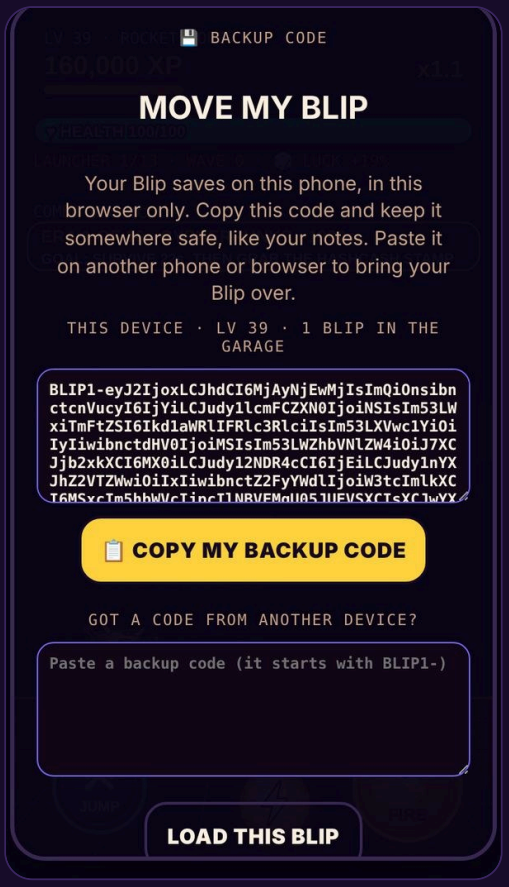

A friend's challenge

13

Backup code: move your Blip

Your Blip saves **on this phone, in this browser only**. Another browser or phone starts fresh, and clearing your browser data wipes it.

To keep it safe or move it, tap **BACKUP CODE · MOVE MY BLIP** on the menu, then **COPY MY BACKUP CODE** and keep it in your notes. On the other phone or browser, paste it and tap **LOAD THIS BLIP** twice. Your level, XP, Garage and badges all come across. When you reach level 10, the game reminds you once.

The backup code screen

STAY SAFE

The backup code is only game progress. This game never asks for a seed phrase, key or wallet, and nobody real ever will.

14

Extras

The public board & the Genesis Cup

After a run, a yellow box asks for a **nickname** (like satoshi.btc). Pick one once and tap **POST**. After that, every run posts by itself and the box shows your rank. Only the nickname, score, era and date are saved. Never use a wallet address as a nickname.

🏆 **LEADERBOARD** on the menu shows the board: **THIS WEEK**, **ALL TIME** and 👑 **WINNERS**. Your own name is marked in gold. **MY BESTS ON THIS PHONE** and **CHALLENGE A FRIEND** are on the same screen.

The **Genesis Cup** starts Monday 26 Oct and runs every week, Monday to Sunday (UTC). Tap ▶ **PLAY THE CUP MAP** on the board: everyone gets the same map that week, starting at era 1, and only those runs count for the week. The best Cup score of the week joins the winners list. It's for bragging rights only: no money or token prizes.

Report a problem

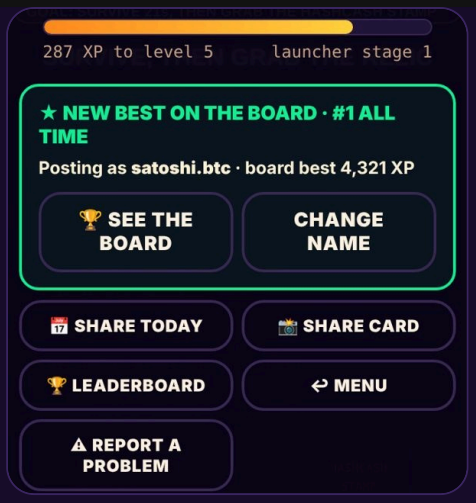

Tap ⚠ **REPORT A PROBLEM** on the pause screen or the run-over screen. Pick where it happened, write a few words and tap **SEND REPORT**. Blip reads every report. Never type a seed phrase, password or wallet address there.

Hold fire

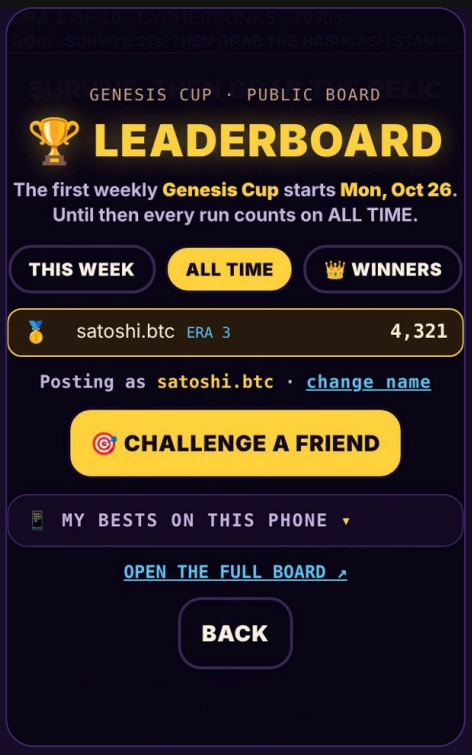

The **HOLD FIRE** switch on the menu lets you hold the FIRE button instead of tapping. It's off unless you turn it on.

BLIP·YIELD

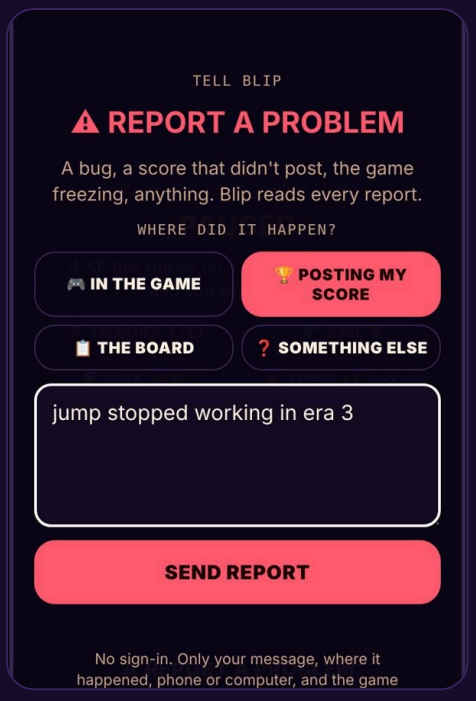

Genesis Run is a BLIP·YIELD game. The small line at the bottom of the menu opens the BLIP·YIELD Stacks yield tracker in a new tab.

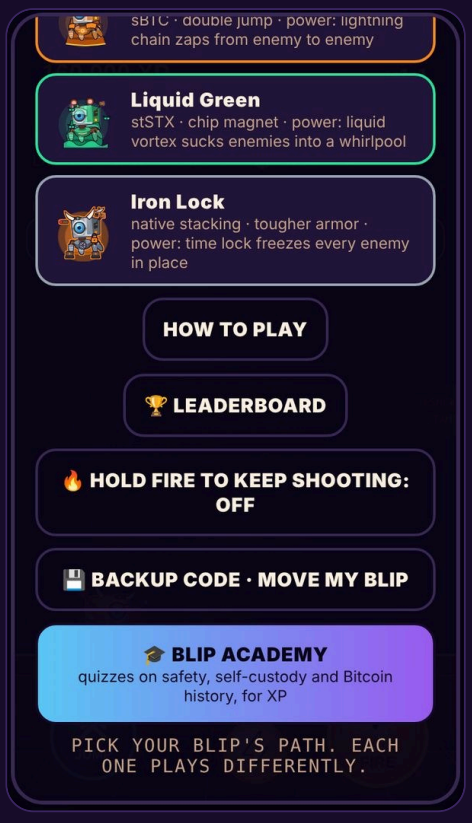

Your run on the board

The leaderboard

Report a problem

Menu switches

15

The secret level

There's a locked door on the menu. It opens once you walk all of history.

Spoiler: tap to see what's behind it

16

♥ Tip jar

Genesis Run is free, with no ads and no token. If it made you smile or taught you some history, you can send Blip a tip at either address. These are the same addresses as the tip jar in the game.

STX · sBTC on Stacks

SPYGZ54VVPHMQBSBR4KYMBJV7ZRCC32GV3YGZGHK

BTC on Bitcoin

bc1quyt6q5l5695jcjwgc06uvgvz0cklq68erc8umm

Tips are a thank-you, nothing more. They never unlock anything in the game, and nobody will ever ask you to connect a wallet. Always check the whole address before you send. NFA.
